MAISON Glamour et Grâce
AERIAL MEDIA & DELIVERY

CAPABILITY STATEMENT

EMERGING TECHNOLOGY · WORKFORCE READINESS · CAREER OPPORTUNITY

COMPANY OVERVIEW

Maison Glamour et Grâce builds industry-aligned workforce education and credential-readiness pathways that help young adults and career changers prepare for opportunities in artificial intelligence, drone technology and emerging digital industries. Through instructor-led learning, practical projects, career exploration and assessment preparation, we help bridge the gap between foundational knowledge and professional opportunity.

CORE COMPETENCIES

Workforce Training & Instructional Design AVAILABLE NOW

- Customized training design and curriculum development
- AI literacy and responsible AI professional development
- Technology integration and digital adoption training
- Train-the-trainer professional learning
- Competency-based assessment and learner progress monitoring

Workforce Pathways PILOT PARTNERSHIPS

- **AI & Digital Workforce:** AI literacy, data skills and preparation for independently offered credentials, including IBM SkillsBuild and Cisco Networking Academy programs
- **Drone & Aerial Technology:** preparation for the FAA Part 107 aeronautical knowledge test and commercial drone career exploration
- **Emerging careers:** drone operations, AI training data, geospatial technology and autonomous operations

Training Formats

- Workshops (2–3 hours), foundational series (8 hours) and applied pilots (12–16 hours)
- In person, live virtual or hybrid, for cohorts of about 8–20

School Partnerships

- Future Ready AI, grades 3–12, and Drone Career Explorer, grades 6–12

In Development

- AI, drone data and geospatial technology pathway
- Aerial media, mapping and construction documentation
- Drone delivery workforce partnerships

PARTNERSHIP OPPORTUNITIES

For community colleges, workforce boards, employers and community organizations:

- Co-designed and sponsored workforce training cohorts
- Curriculum development and skill-requirement alignment
- Pre-apprenticeship and apprenticeship-related instruction, developed with colleges and program sponsors
- Credential-readiness workshops
- Applied projects, guest speakers and career exploration events
- Faculty collaboration and educator professional development

DIFFERENTIATORS

- **More than access to a course:** instructor-led learning, guided assessment preparation and practical application
- **Portfolio-based:** learners show skills through completed projects
- **Measured outcomes:** knowledge checks, skill demonstrations and partner evaluation summaries
- **Human-centered AI:** AI assists; people verify outputs and remain accountable

LEADERSHIP

Andrea Davis-Baptiste, Founder & CEO, is a learning and development professional with more than 17 years of experience designing and facilitating technology-focused learning, supporting digital adoption and advancing learner development. Her background spans instructional design, professional learning, technology enablement and educational leadership.

TARGET PARTNERS

- Community colleges and universities
- Workforce boards and development agencies
- Employers and industry associations
- Community and government organizations
- School districts and youth programs
